BUSINESS:

With Plastics, recently being portrayed as a villain of the environment and receiving the most criticism, you must be wondering whether this is the right industry to be in or not.

Hear Mr. Kamal Nanavati, the man who is largely responsible for the rapid growth of plastics industry in India, delineate “The Future of the Plastics Industry – a Threat or still an Opportunity”

While the global market is expanding with growing resentment over Chinese products, India is rightly placed to capture the growing global market for plastic finished goods.

What is the future for exports from India? How to encash these opportunities? Listen to the expert!

Meet our ever-obliging sponsors who also offer great machinery and auxiliaries for the industry.

Stand a chance to even strike a great bargain on your next purchase!

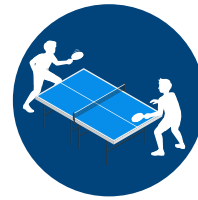

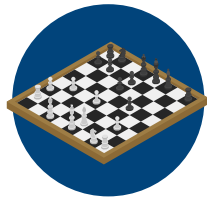

LEISURE:

Master the art of enjoying fun and leisure while still focusing on Business.
